Confirmation of Participation and Exam Certificate: CSCS-USI Summer School 2026 on Effective High-Performance Computing & Data Analytics

To whom it may concern,

We confirm that Innocent Kisoka was selected for participation in the CSCS-USI Summer School 2026. Innocent Kisoka participated in 6 days of lessons and hands-on exercises on the topic of *Effective High Performance Computing and Data Analytics* organized by the *Swiss National Supercomputing Centre* (CSCS) and the *Università della Svizzera Italiana* (USI) from July 25 through 31, 2026. The program also included two keynote presentations by lecturers from industry, and a guided visit of the *Swiss National Supercomputing Centre*.

Topics covered by the program:

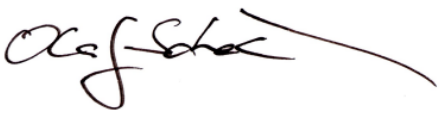

- GPU architectures
- GPU programming (CUDA)
  - Programming model
  - Memory management
  - Performance optimization and scientific libraries
- GPU-accelerated computing with Python
  - CUDA Python
  - Numerical and communication libraries

The topics were covered across 28 hours of lectures, with additional intensive lab sessions composed of diverse hands-on exercises.

The content of the course was tailored for intermediate graduate students (Master's students, and Ph.D students, particularly EUMaster4HPC students) interested in both learning parallel programming models and having hands-on experience using HPC systems, including GPUs.

Innocent Kisoka successfully passed the exam, earning **six ECTS** credit points from USI with a binary grade of: **Pass**

Best regards,

Prof. Dr. Olaf Schenk
Director for USI MSc in Computational Science
